Section 1 — Getting Started

You can go from a brand-new visitor to earning your first certificate in four steps. Each step below explains what to do and why it matters.

1

Sign in or register

Go to the Home page and click Register to create a free account, or click Login if you already have one. Keradion saves your progress automatically once you are signed in, so you can pick up where you left off on any device.

2

Pick a course

After signing in you will land on the Course Catalog. Use the search bar to find a topic (for example, "JavaScript" or "React") or browse by category and level. Click a course card to read its details before enrolling.

3

Learn lesson by lesson

Open any lesson inside your enrolled course, read the material, try the code examples, then mark the lesson complete. Work through lessons in order for the best understanding — each lesson builds on the last.

4

Take quizzes, earn your certificate

After studying a lesson, take the short quiz to test your understanding. Once you have finished the required lessons and passed the quizzes, the Certificate page unlocks and you can download your achievement.

Tip

Some pages are only available after you sign in. If you click a link and get sent to the Login page, just sign in and you will be taken back to the page you wanted automatically.

Section 2 — Dashboard

The Dashboard is the first screen you see after signing in. Think of it as your personal homepage — it shows everything happening with your learning in one place.

What to do on this page:

- ✓ Look at the progress cards at the top to see how many lessons you have completed.
- ✓ Use the "Continue learning" button to jump back into your current course.
- ✓ Check the Results section to see your most recent quiz scores.
- ✓ Click the Live Sessions shortcut to see any upcoming classes you are enrolled in.

Tip

Bookmark /dashboard in your browser so you can return to your learning hub quickly every day.

Section 3 — Course Catalog

The Course Catalog lists every course available on Keradion. You can search, filter, and browse until you find the topic that fits your current goal.

What to do on this page:

- ✓ Type a keyword into the search bar (for example, "HTML" or "Node") to find courses by topic.
- ✓ Use the Level filter to choose Beginner, Intermediate, or Advanced.
- ✓ Use the Category filter to browse by subject area.
- ✓ Click a course card to open its details page before deciding to enroll.

Tip

Not sure where to start? Filter by "Beginner" and start with HTML & CSS — it is the foundation for everything else on the platform.

Section 4 — Course Details

The Course Details page gives you a full preview of a course before you commit to it. Read it carefully so you know exactly what you are signing up for.

What to do on this page:

- ✓ Read the description to understand what the course covers and who it is for.
 - ✓ Check the Level (Beginner / Intermediate / Advanced) to see if it matches your current skills.
 - ✓ Scroll down to see the list of lessons included in the course.
 - ✓ Click "Enroll now" when you are ready to start. You can enroll in multiple courses at the same time.
-

Section 5 — Course Lessons

After enrolling, the Course Lessons page shows you every lesson inside the course. Lessons are displayed in the order you should study them.

What to do on this page:

- ✓ Click "Continue learning" to resume from where you left off.
- ✓ Lessons with a green checkmark are ones you have already completed.
- ✓ Click any lesson title to open and study it.
- ✓ Look for a small quiz icon beside a lesson — it means a quiz is available after you finish the lesson.

Tip

Work through lessons in order. Each one builds on the previous so skipping ahead may leave gaps in your understanding.

Section 6 — Lesson Viewer

The Lesson Viewer is where you actually study. This page shows the full lesson content — text explanations, code examples, and any resources linked by the instructor.

What to do on this page:

- ✓ Read the lesson text from top to bottom. Take your time — there is no timer.
- ✓ Try any code examples in the editor if one is shown on the page.
- ✓ Use the Resources section at the bottom to download extra files if provided.
- ✓ Click "Mark as complete" once you have finished reading and trying the examples.

Tip

You can mark a lesson complete and come back to it later. Your progress is saved automatically.

Section 7 — Lesson Quiz

After finishing a lesson you can take a short quiz to check what you have learned. The quiz gives you instant feedback on each answer so you can learn from any mistakes.

What to do on this page:

- ✓ Read each question carefully before picking an answer.
- ✓ Click your answer, then click "Submit" (or "Next") to see the feedback.
- ✓ Green feedback means you got it right. Red feedback shows the correct answer.
- ✓ Click "Retake quiz" at the end if you want to improve your score.

Tip

There is no penalty for retaking a quiz. Only your best score is saved, so keep trying until you are happy with the result.

Section 8 — Live Sessions

Live Sessions are scheduled online classes run by instructors. If you are enrolled in a course that has live sessions, they will appear here.

What to do on this page:

- ✓ Check the date and time for each session shown on this page.
- ✓ Click the session link or the "Join" button when the class is about to start.
- ✓ The link will open a video call in a new tab (usually Google Meet or Zoom).
- ✓ Return to this page to see recordings if they are made available after the class.

Tip

Sessions are linked to courses you are enrolled in. If you do not see any sessions listed, check that you have enrolled in a course that offers them.

Section 9 — Results

The Results page shows a history of every quiz you have taken across all your courses. Use it to see your improvement over time and revisit lessons you found difficult.

What to do on this page:

- ✓ Each row shows the course name, lesson name, your best score, and the number of attempts.
 - ✓ Click a result row to open the detailed breakdown of that quiz attempt.
 - ✓ Use the "Retake" button inside the detail view to try the quiz again.
 - ✓ Check scores regularly to spot topics where you may need more practice.
-

Section 10 — Profile

Your Profile page is where you manage your account details. Keep your information up to date so your name appears correctly on certificates.

What to do on this page:

- ✓ Click your name or avatar in the top navigation bar to open your profile.
- ✓ Update your display name if it needs changing.
- ✓ Upload a profile photo by clicking the avatar circle.
- ✓ Change your password in the Security section — use a strong password with letters, numbers, and symbols.

Tip

Your profile name is printed on your completion certificates, so make sure it is correct before you finish a course.

Section 11 — Certificate

When you complete all required lessons and quizzes in a course, a Certificate page unlocks. You can download a PDF certificate to keep, share, or add to your CV.

What to do on this page:

- ✓ Finish all required lessons — look for the checkmarks on the Course Lessons page.
- ✓ Pass the required quizzes (any score shown as green/passed counts).
- ✓ Navigate to the Certificate page from the course menu or the Dashboard.
- ✓ Click "Export certificate" to download the PDF.

Tip

Certificates include your name, the course name, and the completion date. Share them on LinkedIn or add them to your portfolio to show employers your new skills.

Section 12 — Admin and Instructor Area

This section is for admins and instructors only. If you are a regular student, you will not see this area. It is the control panel for managing all platform content.

What to do on this page:

- ✓ Use the Admin menu in the top navigation to access the dashboard, courses, lessons, quizzes, and users.
- ✓ To manage courses: go to Admin > Courses and use the Add, Edit, or Delete buttons.
- ✓ To manage lessons or quizzes: go to Admin > Lessons or Admin > Quizzes.
- ✓ Instructors can also manage Live Sessions from Admin > Live Sessions.

Tip

Always double-check before deleting content — removing a course will also remove all lesson and quiz data linked to it.

Still need help?

If you are stuck on something not covered in this manual, send an email to our support team. Include the page name and describe what you were trying to do — we will get back to you as soon as possible.
